INTERSTATE CATTLE SERVICES, INC.

Dear Beefmaster Breeders,

The fall has finally arrived and we're getting back into the groove, selling Beefmaster cattle! It has been a long summer, and Beefmaster breeders everywhere are ready to make improvements to their breeding programs. The 2012 Southern Revolution is a production sale representing four distinguished and individual breeding programs. The sale offering is diverse making sure every breeding philosophy is represented, with cattle of popular, promoted, bloodlines, with show ring eye appeal, and data and performance information to be rivaled by none. Yes it is truly possible to have it all in one package. Study these cattle, and you will find each program has a definite breeding philosophy any progressive breeder can identify with. After a short amount of time in the business, you get an appreciation for cattle that are both functional and fit the current market trends. Many breeders totally focus on pedigree, and others totally focus on performance, but few make the effort to incorporate it all in their breeding philosophy.

This sale originated in the off years of the Channarock Farms production sale, allowing us to preserve our sale date, and creating an environment for the smaller breeder to host a production sale. The 2012 sale offering will feature an array of bred heifers all offered by Channarock Farms, and the first time production sale offering from the 2011 BBU new breeder of the year, Bull Creek Cattle Co. of El Paso, Arkansas! In addition to these breeders, you will also be given the opportunity to purchase cattle from Beefmaster's most northern breeder, Kruse Farms, all the way from Wisconsin! Saving the best for last! Kreger Beefmasters, unquestionably the most historic and well established program in this year's line-up will give you the opportunity to purchase some of their most exclusive, and proven genetics.

I would personally like to thank Clark Jones for allowing us the use of his outstanding new sale facility, as well as Justin Williams, his ranch manager, for all of his extra efforts in assisting us with this sale. This is a BBU approved sale, and all cattle will sell to the terms and conditions outlined in the approved sale rules. A BBU representative will be present at the sale to answer any questions you might have. The BBU office has reviewed the contents of the sale catalog, and all paperwork is in place. All cattle are guaranteed by the breeders as they are represented in the catalog. Any updates or revisions will be listed and announced at the sale.

Please make plans now to attend the greatest sale offering for the fall of 2012. Hotels are available in Savannah now; please make reservations early to insure room availability. If you have any questions regarding the sale offering, please don't hesitate to contact myself, or Mike Green, as we will be happy to assist. In the event you are unable to attend, and don't wish to purchase cattle via telephone, Advanced Video Auctions will host the sale online. Please contact Wade Nation for questions, or to register for the sale. We look forward to seeing you Saturday September 8, 2012 in Savannah Tn. at Clark Jones sale facility for the Southern Revolution!

Sincerely,

Dan Waddoups

TERMS AND CONDITIONS OF SALE
ADOPTED BY BEEFMASTER BREEDERS UNITED
FOR BBU APPROVED SALES
Effective September 10, 2010

THE FOLLOWING TERMS ARE APPLICABLE TO ALL TRANSACTIONS
IN BBU APPROVED SALES:

1. **BIDDING:** Each animal will be sold to the highest bidder without reserve.
2. **BIDDING DISPUTE:** The Auctioneer in charge will settle any dispute as to bids, and his decision on such matters shall be final.
3. **TERMS:** Terms of the sale are cash due upon sale, unless prior credit arrangements for the sale have been agreed upon in writing between the Buyer and Seller, in which event, the terms of the written credit arrangement between Buyer and Seller for the sale shall prevail. The failure of a member buyer to pay the appropriate party the sale amounts when due may constitute a cause for exclusion from BBU pursuant to Article I, section 9 of the By Laws of BBU.
4. **PURCHASER'S RISK:** Each animal becomes the risk of the purchaser as soon as the auctioneer declares it sold.
5. **CERTIFICATE OF BREEDING AND/OR TRANSFERS:** All required paperwork will be transferred to the buyer at the seller's expense, upon settlement.
6. **HEALTH:** All animals will have appropriate certificates of veterinary inspection for travel to the sale site and will to the best of the seller's knowledge be eligible for interstate shipment, however, buyers need to be aware of their individual resident state's requirements for shipment of cattle. Any and all testing will have been completed within thirty (30) days of the sale date.
7. **ANNOUNCEMENTS:** Any changes in information of any kind will be announced from the auction box and such announcements shall take precedence.
8. **BREEDING GUARANTEES:**
 - a) **FEMALES: OPEN AND/OR EXPOSED FEMALES:** Females younger than twenty-four (24) months of age can be sold as open. Open females are so guaranteed. Any female is considered a breeder if she is certified to be pregnant by a licensed veterinarian at the time of sale and/or has a nursing calf at side. Cows (including donor cows) with calves at side six (6) months or older must be certified to be pregnant by a licensed veterinarian.
 - b) **SAFE IN CALF FEMALES** have been examined by a competent veterinarian and are so guaranteed.
 - c) **BULLS:** Bulls eighteen (18) months or older are guaranteed to have passed a Bull Breeding Soundness Evaluation (BSE) and to have been certified a satisfactory potential breeder by a licensed veterinarian within forty-five (45) days prior to sale date. The results of the Breeding Soundness Evaluation (BSE) must be reported on a fully completed official form and attached to the health papers required for the sale.
9. **DISCLOSURE OF PRIOR PROCEDURES:** If known to the seller, there must be a disclosure in the current sale catalog or from the box of any circumcision or other surgical alteration of any underline of any male or female and of any single egg or super-ovulation flush of any female sold in a BBU Approved Sale.
10. **INHERITED DEFORMITIES GUARANTEE:** All bred females are guaranteed not to produce a calf with an inherited deformity occurring in Bovine for a period of nine months following date of sale.
11. **REPRESENTATIONS AND GUARANTEES:** All representations and guarantees, whether set forth in sale catalogs, these Terms and Conditions of Sale or otherwise, are solely those of seller and are not those of BBU. Except for the assurances set forth in the Approved Sales Agreement that an animal does not exhibit a genetic defect and that its registry information is consistent with the information in BBU's records, BBU makes no representations, warranties, guaranties or assurances whatsoever.
12. **RIGHTS AND OBLIGATIONS:** The above terms and conditions of sale shall constitute a contract between buyer and seller of each animal and shall be equally binding upon both. Each sale or resale of an animal constitutes a separate transaction. Neither BBU, the sale manager, nor any other person connected with the management of the sales assumes any liability, legal or otherwise, for any subsequent resale of an animal.
13. **REMEDIES:**
 - a) **OPEN AND/OR EXPOSED FEMALES** are guaranteed to be breeders by twenty-four (24) months of age except in cases of animals purchased and then fitted for show or administered any super ovulation drug. In cases of animals fitted for show or administered any super ovulation drug after purchase, the breeding guarantees, if any, shall be such as agreed upon between buyer and seller. All claims for a refund must be made in writing to the seller within six (6) months after the animal reaches twenty-four (24) months of age. Open females are so guaranteed. If within sixty (60) days after the sale date, a female sold as "open" proves to be with calf, the buyer may return the female to the farm of the seller, provided the female is in good condition and in compliance with the health requirements of the seller's state, and receive refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The buyer's failure to notify the seller within sixty (60) days from the date of sale and to make the election as hereinabove provided shall relieve and absolve the seller of any duty, obligation or liability to the buyer regarding the purchase of said female. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller.
 - b) **SAFE IN CALF FEMALES** have been examined by a licensed veterinarian. If within thirty (30) days after sale date, a female sold as "safe in calf" proves not to be in calf, the buyer may immediately request that the female receive service from the bull previously used, if available, or return the female to the farm of the seller, provided the female is in good condition and in compliance with the health requirements of the seller's state, for a refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The buyer's failure to notify the seller within thirty (30) days from the sale date and to make the election as hereinabove provided shall relieve and absolve to the seller of any duty, obligation or liability to the buyer regarding the purchase of said female. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller.
 - c) **FLUSHES AND TIME REQUIREMENTS:** A flush consists of all viable embryos, transferred or frozen, received from a female as the result of the administration of any super ovulation drug. The sale of a flush or resulting pregnancies must specify in the sale catalog the number of pregnancies guaranteed and the disposition of any other pregnancies resulting from the flush, the disposition of any frozen embryos resulting from the flush and any additional charge for the recipient cows. The maximum time for the delivery of the guaranteed results must be specified along with a payment schedule. Non-delivery or only partial delivery by the specified time by the seller will result in a pro-rata refund of all monies previously paid by the buyer for such flush or pregnancies not delivered.
 - d) **PREGNANCY AND/OR PREGNANT RECIPIENT COW:** Pregnancy and/or pregnant recipient cow is a cow of any breed that is carrying a pregnancy (guaranteed to have been examined by a licensed veterinarian as safe in calf) as the result of a flush as so stated on the certification of embryo transplant form. Such pregnancy and/or pregnant recipient cow is guaranteed to be carrying the embryo pregnancy so stated and if found not safe in calf by a licensed veterinarian within thirty (30) days of delivery of the recipient cow to the buyer, the buyer will have the same remedies as set forth in clause b) for the safe in calf females. The amount bid by the buyer for the individual pregnancy and/or pregnant recipient cow offered at a sale will be inclusive of the recipient cow. A pregnancy and/or pregnant recipient cow should be available at the sale site; however, if not available it must be delivered to the buyer, at the seller's expense, within thirty (30) days of the sale with the necessary health papers sufficient for delivery to the buyer.
 - e) **CLONES:** Only BBU replication cell-cloned animals shall be eligible for registration and eligible to sell in BBU Voluntary Approved Sales. Genetically modified animals shall not be eligible for registration and cannot sell in BBU Approved Sales. Cloned animals shall be guaranteed by the seller to be breeders under the same terms of the agreement for females and bulls. *Any additional guarantees with respect to clones shall be a separate agreement between buyer and seller.*
 - f) **BULLS:** If within one-hundred twenty (120) days from the date of sale, the bull has failed to pass a Breeding Soundness Evaluation ("**BSE**") certified by a licensed veterinarian, buyer must send seller written notification of the failure of the test within one-hundred and twenty (120) days from the date of sale and include the BSE test results. Within sixty (60) days after seller's notification of the failed BSE test, buyer and seller shall identify a mutually agreeable licensed veterinarian or technician certified by a licensed veterinarian to perform another BSE on the bull at the buyer's expense. The results of the test shall be deemed final and conclusive of this matter and binding on buyer and seller. If, in the opinion of said veterinarian, the bull is unable to pass a BSE and be confirmed a satisfactory potential breeder, he shall so certify in writing to the seller and the buyer which shall include the official form used by the Society of Theriogenology or the official BBU Breeding Soundness Evaluation form. In such event the buyer may return the bull to the farm of seller, provided the bull is in good condition and in compliance with the health requirements of the seller's state, for a refund of the full purchase price. The acceptance of the refund of the full purchase price shall in any case be deemed full satisfaction and settlement of the matter. The seller and buyer shall bear equally all reasonable and necessary transportation expenses that are incurred in returning the animal to seller. A listing of industry standards for Scrotal Circumferences for bulls at various ages will be printed in the sale catalog. Satellites, Marketing Groups, or individuals may specify additional guarantees.

Kreger Beefmasters, Joe & Joe Bayne Kreger..... 64-65
Oklahoma City, OK
580-628-3848

Voluntary Classification Guidelines:

Cattle are visually inspected by a BBU field representative for desirable traits. Each animal is classified according to BBU's Standards of Excellence.

Any bull or female in the "U" category will be so designated on the BBU Certificate of Breeding along with the date and initials of the BBU field representative. To be presented for a "U" classification, males and females must be a minimum of 8 months with no upper age limit. Classification of Certified Beefmaster cattle is \$5.00 per head or \$350.00 per stop, whichever is greater.

Any bull or female in the "X" category will be removed from the registry by BBU's office and so noted by correspondence to the member. BBU will not charge the member a classification fee for an "X" animal.

Bulls must have a yearling scrotal measurement (taken between 320-410 days of age) of at least 30 cm to meet the "U" qualification. A measurement of 34 cm is the objective.

All cattle presented for classification must have permanent identification and must be certified or an application for certification must be presented to the field representative.

To receive a number score all animals must have a "U" classification.

All animals (male and female) aged 13 months and up may be presented for "U" classification and number scores for conformation and underline, with the stipulation that if the animal is seen later in a BBU Approved or Sanctioned Sale it is subject to reclassification by the BBU field representative at the sale (at no charge).

Scrotal Circumference Scores:

SCORE:	AGE		
	15-20 Mo. Old	21-30 Mo. Old	Over 30 Mo. Old
Very Good	More than 37 cm.	More than 39 cm.	More than 40 cm.
Good	31-37cm.	32-39 cm.	33-40 cm.
Poor	Less than 31 cm.	Less than 32 cm.	Less than 33 cm.

BBU Mission Statement

BBU's Mission is to enhance breeders' ability to raise and promote cattle based upon the founding "Six Essentials."

*Disposition - Fertility - Weight - Conformation -
Hardiness - Milk Production*

Our Vision: To increase worldwide demand for Beefmaster cattle.

Guiding Principles:

- 1.) Always strive for breed improvement.
- 2.) Never compromise Integrity.
- 3.) Expand...Encourage...Educate...

Channarock Farms

Dear Fellow Beefmaster Breeders,

On behalf of Channarock Farms, I personally would like to invite you to the 2012 Channarock and friends Southern Revolution Sale. I would like to thank my good friend Clark Jones and his ranch manager Justin Williams for the use of his spectacular new sale facility. This will be the second Southern Revolution sale we have held, and we plan to make it a Beefmaster tradition. We designed this sale to offer our many friends in the Beefmaster breed, the opportunity to market their cattle in a production sale atmosphere, along with other breeders who share a similar breeding philosophy.

When you study the sale offering you will notice a majority of cattle all come from popular and proven classic Beefmaster cow families. Proven genetics are an important part of the equation, but not the whole picture. Serious commercial cattlemen throughout the Southeast and central states require reliable performance data and information on the cattle they purchase. 50% of our total product is bulls, and in order to cash flow our operation, we need to sell a high percentage of these bulls. Ultrasound evaluation has allowed us to gauge our program making sure the sires we are using on our pedigreed Beefmaster cattle are truly improving our herd. Upon implementing an annual ultrasound program, we have seen a steady increase in our ultrasound results, mainly by identifying the sire who offers the most.

Most performance programs tend to only focus on performance, forgetting there are other attributes required for selling purebred cattle. Our program prides itself in producing show quality cattle, capable of winning futurities and halter shows. It is our goal to produce quality Beefmaster cattle with reliable performance to improve any program it is introduced into; that are functional, and have show ring eye appeal. All of these cattle are derived from the popular and respected cow families our breed is built upon.

Weights and measures are another important tool utilized in our herd. Accurate weights, turned in at the appropriate times, are the only means our breed will ever have to offer a reliable EPD base. We depend on EPDs as much as pedigree and conformation when making mating decisions on our cattle. When mating cattle we pay attention to all the EPD numbers. We desire cattle with low birth, high weaning, high yearling, and high maternal traits. Not always is the perfect sire available, but we choose the sire with the most to offer, to improve our cattle.

Herd health is also an important factor, our cattle are all vaccinated and wormed twice every year, using a modified live virus vaccine, and rotating spectrums of wormer. In addition to herd health, nutrition is equally as important. Our cattle are given a high quality free choice mineral, and high quality forage. Cattle should be able to thrive on grass pasture with supplementation only in the winter months.

In a nut shell, the Channarock breeding philosophy is to produce Quality Beefmaster cattle, with maximum performance, show ring eye appeal, that forage and survive on grass pasture.

Please accept this invitation to the Southern Revolution Sale, if you have questions regarding the sale cattle, or if we can assist in making travel arrangements, please don't hesitate to ask! The sale will be held at Clark Jones' sale facility, in Savannah Tn. Saturday September 8, 2012 at 10:30 a.m. See you in Savannah!

Sincerely,

Charlie Jones

Bull Creek Cattle Co.

On behalf of my wife Cynthia, our two children , Cole and Kylee, and myself we are proud to invite you to our first production sale offering at the Southern Revolution Sale in Savanna, TN. We started our Beefmaster herd in the spring of 2009 striving to build around the six essentials the Beefmaster breed was founded on. Our main goal is to produce bulls for the commercial cattlemen in our area that will excel in this climate; add pounds to their calf crop; and produce quality replacement females they can build their herd around. We believe the way to do this is to have herdsires and females with proven pedigrees, EPDs, and ultrasound data. As you can see with our sale offering we try to obtain all the information we can on our calves. This in turn will help you, the buyer, make informed decisions on females and bulls that will improve your herd and build a good foundation. Most of the cattle being offered for the sale will have recorded BW, WW, YW, ultrasound data, pelvic score measurements, classification from a BBU Field Rep., and a forage only gain test last spring. We are here to offer you cattle you can have complete confidence in and will make your program profitable. If you have any questions on the sale cattle or our program please feel free to call me anytime. We truly hope you will consider joining us for fun and fellowship in Savanna, TN on Saturday, September 8, 2012.

Sincerely,

William and Cynthia Dismang

DNA US30003269. 27T, a totally proven donor female straight out of the heart of our breeding program. Study the way this female is put together. She is deep sided, with lots of volume, thickness, and bone. 27T has proven herself worthy of being a flush quality female, producing 15 quality embryos, with results better than a 50% conception. She has done this while maintaining a solid 365 day calving season. 27T calved as a 2 year old on 9/22/09 producing a bull calf, she was flushed on 12/14/09, calved again on 10/24/10 producing the 13/10 herdsire prospect selling in this sale (lot 36), calved 10/22/11 with a heifer calf, and now is selling heavy bred to TomKat, as a proven donor. If your program requires a totally proven, donor quality female, study this exceptional female, and purchase with total confidence.

28/10 and 63/10, selling as a pick of bred heifers, represent the Soul Sister cow family. Soul Sister is one of the best producing Soul Man x Jim Bradley's Lady Tiger females in the Beefmaster breed. Upon study of these two females, you will find they are structurally perfect. Excellent hip structure, great feet and legs, and conformation second to none. Each have exceptional scan data and EPDs to fit any performance oriented program. These females also were part of our on ranch forage test program; please be sure to study their results. Calfhood vaccinated.

5/11 is the 2011 calf of 31/8 (lot 46). Because Zorro was such a good mating to Jungle Essence, it was no contest to mate 31/8 the same way, producing this excellent individual. This cow family is well represented in the sale offering, and should earn your confidence as you view the balance of the sale. 5/11 was AI bred to NSync, the Synergy son of Oasis, and cleaned up to Buckeye, our latest young herdsire. Calfhood vaccinated.

Rare genetics here! A Bojangles out of Alley-Oop who did a great job for us. She is an excellent milker and carries the carcass traits to go with. The calf's sire is Gusto, our black full brother to Genesis, who is throwing some really sharp calves. This calf is a looker, with a genetic package you won't find anywhere else. Calfhood vaccinated. Pedigree of calf.

An own Painted Tiger daughter out of our cornerstone Achtung donor. Achtung is deceased, and all of her embryos are gone, so JK 150/6 is a truly exclusive donor prospect. Full sister to our top producing donor, JK Wild Honey, two donors at Collier Farm and one at Maneth Beefmasters. Half-sister to two Houston Futurity Champion herd bulls. JK Dream Bull is the real opportunity in this package. Study him. This is what herd bulls look like when they are growthy, sucking calves. The cow is a heavy milker with a perfect udder, and she's putting all her groceries in the calf. Calfhood vaccinated. Pedigree of calf.

Bid and Buy live using the industry's best real time interactive online auction service.

www.advancedvideoauctions.com

Advanced Video Auctions (AVA) provides live video auctions, webinars, and many other marketing and meeting presentations in real time over the internet.

The AVA system was created and developed especially for the marketing and promotion of livestock and is well proven to provide a unique presentation for various livestock events via the internet.

Videos, still images and detailed information on each of the lots offered are available prior to the sale and may be viewed anytime at www.AdvancedVideoAuctions.com. You do not need a username or password in order to preview the sale offering prior to the sale, but we do encourage you to **Register Early** for the sale to obtain your username and password that you will be able to use on the AVA system for each sale where you desire to become a buyer.

On sale day you will log on with your username and password and will then be able to view the auction broadcasted with either live streaming video or pre-recorded video of the lots and on some events, you will see both. In addition, the AVA system provides **live streaming audio** from the sale site so you don't miss any part of the auction action, hearing the auctioneer and other comments announced. Plus, you can **privately chat** in real time with the on-site bid administrator.

Please go to www.AdvancedVideoAuctions.com to register for the sale or event. You only have to register once for all events held! Please try to register prior to sale or event day. Also, please note that payment terms are unique and specific for each sale. Please review any of the sale terms ahead of time and if you have any questions, you can contact the sale personnel designated for that auction.

Optimal Connection Speed: DSL, Cable internet or any Broadband internet connection, Minimum download speed of 512 is recommended.

Computer Requirements: Most any computer 6 years old or younger with the latest versions of Internet Browsers: Internet Explorer or Firefox with the Adobe Flash player installed are recommended. You can download the current version of the Flash player at www.adobe.com.

Best Viewing: Set your computer screen to at least 1024 x 768 pixels.

Sale Day Help Desk: 888-354-0181
